Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 2 is rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent 6,555,232 to Aiken et al.

Regarding claim 2, Aiken discloses an aluminosilicate glass material (coating) having a composition comprising 70-84 mol% SiO₂, 6-18 mol% Al₂O₃ and 2-15mol% La₂O₃, which falls within the claimed compositional elemental ratio ranges, on a polysilicon layer (substrate). Claim 2 is a product by process claim wherein the patentability of the product does not depend on its method of production. "If the product in the product by process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process unless it can be shown that the product produced by the process is in some manner measurably distinct from the product produced by another process." See *MPEP 2113*. As such, the process limitation within claim 2 does not provide patentable distinction over the prior art.

Allowable Subject Matter

Claims 3-7, 11-19 and 22 are allowed. Prior art of record does not disclose or render obvious articles having all of the limitations of claims 3, 4 or 22 or their dependent claims.

Response to Arguments

1. Applicant's arguments filed 5/1/07 have been fully considered but they are not persuasive. Claims 5, 7 and 11 have been indicated allowable since written in independent form. The 112 rejection of claim 6 has been withdrawn and claim 6 has been indicated as allowable.
2. Regarding claim 2, Aiken discloses an aluminosilicate glass material (coating) having a composition comprising 70-84 mol% SiO₂, 6-18 mol% Al₂O₃ and 2-15mol% La₂O₃, which falls within the claimed compositional elemental ratio ranges, on a polysilicon layer (substrate). Claim 2 is a product by process claim wherein the patentability of the product does not depend on its method of production. "If the product in the product by process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different

process unless it can be shown that the product produced by the process is in some manner measurably distinct from the product produced by another process.” See *MPEP 2113*. As such, the process limitation within claim 2 does not provide patentable distinction over the prior art.

3. The two layers taught by Aiken are substantially similar to applicant's claimed layers so are considered to anticipate.
4. The rejection over claim 2 is maintained.

Conclusion

1. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
